# Latest technology

The paintshop incorporates a drying oven that can produce fully-hardened paint in under an hour, and the state-of-the art filtration system ensures maximum efficiency with minimal pollution.

# Capacity

height	6m (20ft.)
width	10m (33ft)
length	20m (66ft)

The facility can handle equipment up to the dimensions shown in the adjacent table. Our extensive lifting capacity means that handling large and heavy loads is no problem, and the site is designed especially to accommodate heavy transport.

We can also design, source and fit any graphics decals if required.

# Accident damage repair, Rebuilds & modification

Our well-equipped workshops with experienced design and fabrication personnel, fitters and electricians are Available to carry out accident damage Repairs, full machine rebuilds, Upgrades and 4 year tests/inspections.
