Latest technology

The paint shop incorporates a drying oven that can produce fully-hardened 2 pack paint in under an hour, and the state-of-the art filtration system ensures maximum efficiency with minimal pollution.

Capacity

height	6m (20ft.)
width	10m (33ft)
length	20m (66ft)

The facility can handle equipment up to the dimensions shown in the adjacent table. Our extensive lifting capacity means that handling large and heavy loads is no problem.

We can also design, source and fit any graphics decals if required.

Fabrication, repair and modification

AGD also has well-equipped workshops with experienced design and fabrication personnel, fitters and electricians. So on large equipment it may be beneficial to have any modification or repair work carried out by AGD.
